

ABOUT:

I'm a 24 year old website developer with a passion for creating user friendly, dynamic and stylish websites.

I have an extensive skill-set that allows me to manage websites from the coding and database management side, to the user experience and aesthetics.

In my spare time I enjoy playing football, reading books and watching films.

EMPLOYMENT:

Mondofacto: 07/08 – Present (Position: Website Developer – www.mondofacto.com)

I currently work for and actively manage this website. Controlling this website has greatly improved my technical expertise, and given me excellent experience of managing a website on a large scale.

This role allowed me to build upon the key skills I learnt at university. For example creating and managing databases, developing applications to solve certain problems and working as part of a team to create high quality content.

Buyers Guide: 06/07 – 08/07 (Position: Website Developer – www.buyersguide.co.uk)

I attained this 8 week summer placement through the Shell Step programme. This role helped me develop my communication, technical web development skills, and provided me with experience of working in a professional environment.

EDUCATION:

Newcastle University: 09/05 – 06/08

Bsc HONS Information Systems: First class honours

My time at university allowed me to develop my team work, technical ability and business skills. I learned how to develop applications, deliver presentations and act as a team leader.

I also learned a number of programming languages, systems administration and improved my appreciation of business and marketing. The key thing I learned was the importance of dedication and professionalism to achieve my goals, which was crucial to me receiving a First.

Berwick High School: 09/01 – 07/05

AVCE Information Technology (A), A Level Resistant Materials (B), Physical Education (B), 8 GCSE's (B-C)

I also achieved the Community Sports Leadership Award. In my role as a sports instructor I taught to people of various ages. This required me to combine my sports knowledge and leadership skills.

WEB & DESIGN SKILLS:

Strong: PHP, MySQL, HTML, CSS, JavaScript, jQuery, Photoshop, Systems Administration (Nix)

Competent: AJAX, Java, Ruby, Flash, InDesign
